INTEGRATED FOCUS RING FOR QUICK AND EASY ADJUSTMENTS

INSTRUCTION MANUAL

CONTENTS

SPOTTING SCOPE, TRIPOD, 18X MAGNIFICATION EYEPIECE, 25X MAGNIFICATION EYEPIECE

SET UP

To attach the tripod, lay the Spotting Scope on a soft surface (like a pillow) with the bottom facing up. Screw the tripod into the threaded opening on the Spotting Scope. To attach an eyepiece, place it in the focus ring and rotate it until it falls into place. To remove the eyepiece, pull it with low pressure and rotate until it comes out.

USING YOUR SPOTTING SCOPE

Align the spotting scope with the object to be viewed. Rotate the focus ring until a clear object is obtained.

CARING FOR YOUR SPOTTING SCOPE

Blow away any dust or debris on the lenses and use a soft lens brush to clean them. To remove dirt or fingerprints, clean with a soft cotton cloth rubbing in a circular motion from the center outward. Use of a coarse cloth or unnecessary rubbing may scratch the lens surface and eventually cause permanent damage.

When not in use, store your spotting scope with the protective caps on in a moisture free environment. Avoid touching the lenses with your fingers.

SAFETY WARNING

Viewing the sun with this instrument can result in blindness or other serious eye damage which may be permanent.
